BUG TRACKER SPACE:

BUGS:

Bug 1: Negative expense amount accepted

✓ Description

When submitting an expense via the "Log Expense" form, entering a negative number in the amount field is accepted and processed, instead of being rejected.

Steps to Reproduce:

1. Open the Log Expense Form.
2. Enter -500 as the amount.
3. Submit.

Expected Behavior: Form should reject negative values with a validation error.

Actual Behavior: Expense is logged and balance is incorrectly increased.

Severity: High

Bug 2: Balance doesn't update after expense approval

✓ Description

After successfully logging a valid expense, the dashboard's remaining balance figure still shows the old value until the page is manually refreshed.

Steps to Reproduce:

1. Log a valid expense.
2. View remaining balance on the same screen without refreshing.

Expected Behavior: Balance updates immediately after submission.

Actual Behavior: Stale balance shown until manual refresh.

Severity: Medium

Bug 3: Co-author notification fails for large author lists

✓ Description

When a publication is submitted with 4 or more co-authors, only the first 3 receive the approval notification email.

Steps to Reproduce:

1. Register a publication with more than 4 co-authors.
2. Submit for approval.

Expected Behavior: All listed co-authors receive a notification.

Actual Behavior: Only the first 3 receive one.

Severity: Medium

Bug 4: Stale citation counts from external index

✓ Description

Triggering an external citation index lookup for a registered publication returns the same cached value even after the source index has updated.

Steps to Reproduce:

1. Register a publication.
2. Trigger external citation lookup.
3. Wait for source to update.
4. Trigger lookup again.

Expected Behavior: Updated citation count is fetched and displayed.

Actual Behavior: Old count persists.

Severity: Low

For grants with expenses spanning more than one fiscal year, the burn-up chart's cumulative expenditure line resets or miscalculates at the fiscal year boundary instead of continuing cumulatively.

1. Open a grant with expenses in FY2025 and FY2026.
2. View burn-up chart.

Actual Behavior: Total drops or resets at the boundary.

Severity: High
