Story 1.1: Log an Expense

To Do

Improve Story

...

+

Description

As a Faculty Researcher, I want to log an equipment procurement expense against my grant, so that my spending is recorded and tracked.

SBPS9-9: Epic 1: Track Grant Fund Allocations, Let Faculty Log Equipment Procurement Expenses, Compute remaining budgetary balance and Block overdraft without Dean override

SBPS9-9 /

SBPS9-17

1

Story 1.2: View Remaining Balance

To Do

Improve Story

...

+

Description

As a Faculty Researcher, I want to see the remaining budgetary balance on my grant after logging an expense, so that I know how much funding I have left.

SBPS9-9: Epic 1: Track Grant Fund Allocations, Let Faculty Log Equipment Procurement Expenses, Compute remaining budgetary balance and Block overdraft without Dean override

SBPS9-9 /

SBPS9-18

Story 1.3: Block Overdraft

To Do ▾

✦ Improve Story

▼ Description

As a Faculty Researcher, I want the system to block an expense that exceeds my remaining grant balance, so that I don't accidentally overspend my sanctioned funds.

SBPS9-9: Epic 1: Track Grant Fund Allocations, Let Faculty Log Equipment Procurement Expenses, Compute remaining budgetary balance and Block overdraft without Dean override

SBPS9-9 /

SBPS9-19

Story 1.4: Dean Override

To Do ▾

✦ Improve Story

▼ Description

As a Research Dean,
I want to override a blocked overdraft on a case-by-case basis,
so that I can approve legitimate exceptions without changing the grant cap itself.

SBPS9-10: Epic 2: When a faculty researcher submits a publication with co-authors, The system shall notify each co-author and The system must require their explicit approval before the publication is marked "Confirmed"

Story 2.1: Notify Co-authors

To Do ▾ ⚡ ⬆ Improve Story

⋮ +

▼ **Description**

As a Faculty Researcher,
I want the system to notify each co-author when
I submit a publication,
So that they are aware and can respond to the
submission.

SBPS9-10: Epic 2: When a faculty researcher submits a publication with co-authors, The system shall notify each co-author and The system must require their explicit approval before the publication is marked "Confirmed"

left

SBPS9-10 /

1

SBPS9-21

Story 2.2: Approve Co-authorship

To Do

Improve Story

Description

As a co-author,
I want to review and approve my co-authorship
on a submitted publication,
So that the publication can be marked
"Confirmed" with my consent.

SBPS9-10: Epic 2: When a faculty researcher submits a publication with co-authors, The system shall notify each co-author and The system must require their explicit approval before the publication is marked "Confirmed"

left

SBPS9-10 /

1

SBPS9-22

Story 2.3: Reject Co-authorship

To Do ▾

⚡ Improve Story

▼ Description

As a co-author,
I want to reject my listed co-authorship on a submitted publication,
So that I'm not incorrectly credited on work I didn't approve.

SBPS9-11: Epic 3: Allows faculty to register a publication and periodically update citation counts, either manually or via an external index lookup

SBPS9-11 /

1

SBPS9-23

Story 3.1: Register publication

To Do ▾

⚡ Improve Story

▼ Description

As a Faculty Researcher,
I want to register a publication with its title, venue, and indexing status,
So that it is tracked in the system for evaluation and reporting.

SBPS9-11: Epic 3: Allows faculty to register a publication and periodically update citation counts, either manually or via an external index lookup

SBPS9-11 /

SBPS9-24

1

Story 3.2: Manually update citation count

To Do ▾

✦ Improve Story

▼ Description • Unsaved changes

As a Faculty Researcher,
I want to manually update the citation count for
my registered publication,
So that my publication metrics stay current.

SBPS9-11: Epic 3: Allows faculty to register a publication and periodically update citation counts, either manually or via an external index lookup

SBPS9-11 /

SBPS9-25

1

Story 3.3: Auto-update citation count via external index

To Do ▾

✦ Improve Story

▼ Description

As a Faculty Researcher,
I want the system to periodically fetch citation
counts from an external index,
So that I don't have to manually track and update
them myself.

SBPS9-12: Epic 4: The system should generate a burn-up view per grant showing cumulative expenditure against sanctioned budget over time, and the system should be viewable by both faculty and the Dean

left

SBPS9-12 /
 SBPS9-26

Story 4.1: View own burn-up (Faculty)

To Do ▾

✦ Improve Story

⋮

+

▼ Description

As a Faculty Researcher,
I want to view a burn-up chart of cumulative expenditure against sanctioned budget for my own grants,
So that I can monitor my spending pace over time.

SBPS9-12: Epic 4: The system should generate a burn-up view per grant showing cumulative expenditure against sanctioned budget over time, and the system should be viewable by both faculty and the Dean

Story 4.2: View all burn-up (Dean)

To Do ▾

⚡

⬆ Improve Story

⋮

+

▼ Description

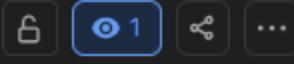

As a Research Dean,
I want to view burn-up analytics across all grants,
So that I can oversee departmental spending and identify at-risk grants.

SBPS9-13: Epic 5: The system shall let a Faculty Researcher submit a new grant application or renewal request, the application must contain proposal details and requested budget and the application must be routed to the Dean

left

SBPS9-13 /
SBPS9-28

Story 5.1: Submit New Grant Application

To Do ▾ ⚡ ⚡ Improve Story

▼ Description

As a Faculty Researcher,
I want to submit a new grant application with
proposal details and requested budget,
So that I can seek funding for my research.

SBPS9-13: Epic 5: The system shall let a Faculty Researcher submit a new grant application or renewal request, the application must contain proposal details and requested budget and the application must be routed to the Dean

left

SBPS9-13 / SBPS9-29

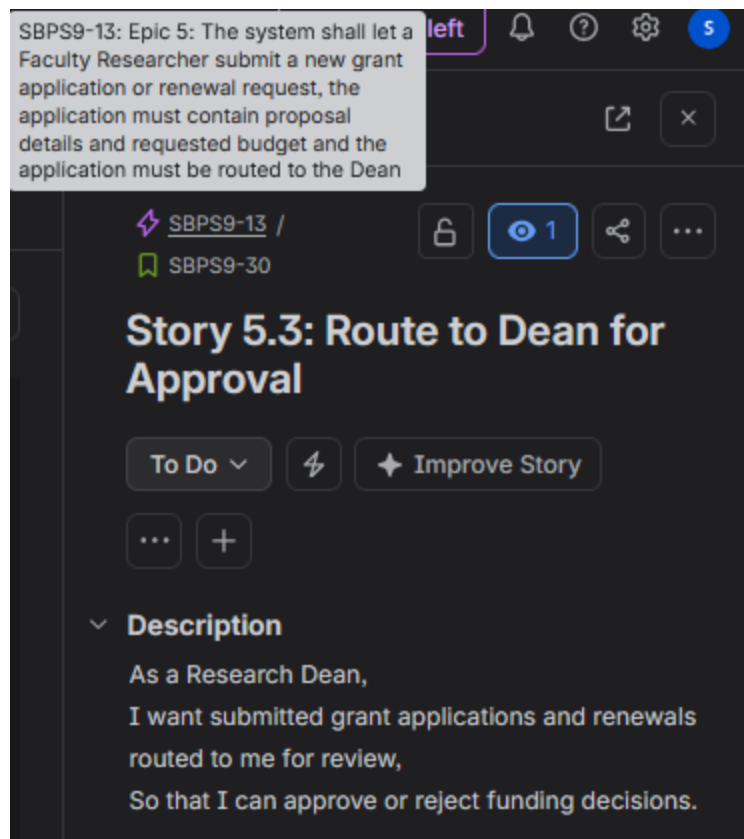

Story 5.2: Submit renewal request

To Do ⚡ ⚡ Improve Story

Description

As a Faculty Researcher,
I want to submit a renewal request for an existing grant,
So that I can continue funded work beyond the original grant period.

SPRINT 3 LOGS

REFLECTION QUESTIONS:

1. Did your estimations reflect the actual effort?

Since this was a simulated sprint rather than real multi-day development, story points were assigned based on relative complexity rather than observed effort. In a real sprint, these estimates would need to be validated against actual time spent.

2. Was your backlog well-prioritized?

Priorities were assigned based on which stories were core to the system's main financial control loop versus supporting or edge-case functionality. Grant submission, expense logging, overdraft blocking, and Dean override were marked High since the system has no meaningful function without them. Supporting features (viewing balances, publication registration, analytics) were Medium, and edge-path or convenience features (co-authorship rejection, manual citation entry) were Low.

3. How did your simulated sprint align with your plan?

Sprint 1 included 5 High-priority stories totaling 23 story points. Of these, most were moved to Done by the end of the sprint, with a couple of stories rolling over into a later sprint after being marked incomplete. This reflects a simplified, but realistic sprint outcome.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed the gap between the ideal linear guideline and actual remaining work. The sprint's planned capacity was slightly optimistic.
